SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with 1.5 years of applied experience in machine learning, deep learning, and data-driven development. Trained 30-50+ students in AI, ML, and Data Analytics, and built computer vision and NLP-based systems including a real-time facial emotion detection model and a voice assistant. Currently applying this foundation to backend and automation development with Python and Django, with a continued focus on AI/ML-driven problem solving.

PROFESSIONAL EXPERIENCE

Python Django Developer

Apr 2026 – Present

Preproc Technologies

- Develop Python-based applications and automation solutions to support internal business processes.
- Design and build backend functionality using Django, working across the application development lifecycle from requirements to deployment.
- Contributing to Kondotty Next, a digital civic platform to strengthen coordination between the MLA and citizens, helping route and address citizen needs through the platform.

Data Scientist / AI & Data Science Trainer

Feb 2025 – Oct 2025

Softroniics, Malappuram, Kerala

- Delivered training to 30–50 students in Artificial Intelligence, Machine Learning, Data Science, and Data Analytics.
- Designed and taught course content covering Python, ML/AI fundamentals, and practical data analytics techniques.

Junior Software Developer

Oct 2024 – Jan 2025

Dhooma Technologies Private Limited, Kozhikode, Kerala

- Developed software solutions including website design and backend development using Django and Python.
- Built a hotel booking system, and contributed to Shopify-based e-commerce development and customisation.

EDUCATION

MES College of Engineering, Kuttipuram (APJ Abdul Kalam Technological University)

2020 – 2024

B.Tech in Artificial Intelligence and Data Science | CGPA: 7.0

Concord English Higher Secondary School, Pannithadam — Higher Secondary (Class XII)

2018 – 2020

Ansar English School, Perumbilavu — Secondary School (Class X)

2015 – 2018

TECHNICAL SKILLS

Machine Learning & AI: Machine Learning, Deep Learning, Computer Vision, NLP, TensorFlow, Keras, OpenCV, CNNs

Data & Analytics: Pandas, NumPy, Power BI, Tableau, Advanced Excel, MySQL

Languages: Python, SQL, PHP

Web & Tools: Django, Git, AWS (Cloud Essentials)

PROJECTS

Crowd Facial Emotion Detection

Sep 2023 – Apr 2024

- Built a real-time system using Python, CNNs, and OpenCV to detect and classify facial expressions across crowds, with configurable alerts for event management and public safety use cases.
- Trained on the FER-2013 dataset across 7 emotion classes, achieving ~90% accuracy at 30 FPS; field-tested on real-world crowd footage to validate emotion detection feedback.

Receptionist Bot in Native Language

Feb 2023 – Aug 2023

- Developed a Python voice assistant that handled user queries in Malayalam, combining speech recognition with NLP to provide in-building navigation and location details.
- Built using Google Speech-to-Text and Text-to-Speech APIs with LangChain for language processing and response generation.

Dairy Farm Management System

Oct 2022 – Dec 2022

- Built a web application in PHP and MySQL to manage herd records, milk production tracking, and resource allocation, with a normalised schema for efficient reporting.

CERTIFICATIONS & LANGUAGES

- AWS Cloud Technical Essentials — Amazon Web Services (Nov 2023)
- Virtual Internship in Robotics — KODACY with SPACE, 15 days (Aug 2023)
- Internship in Data Mining — Rivertech IT Solutions, 7 days (Mar 2023)

Languages: English (professional), Malayalam (native)
